

For Professionals Supporting Grieving Youth

OhioHealth Loss and Healing Services offers training sessions to school and agency professionals who support youth grieving the death of someone in their life. Participants will gain a better understanding of theoretical frameworks for grief support as well as learn and practice hands-on activities to use with children and teens.

Suggested Topics Include:

- National and state statistics
- The impact of grief on children and teens
- Normal grief experiences – feelings and reactions
- Traumatic grief
- Red-flag responses
- Suggestions for caring conversations
- Hands-on interventions to support grieving youth
- Grief educational materials for school and agency personnel
- Resources to share with youth and families

Crisis Planning

Training and consultation is available to help schools develop or revise their crisis response plans according to best practice, including suicide postvention. The training will cover the steps necessary to support students and staff after a death impacting the school community.

Customized Trainings

Professional development trainings related to the impact of loss on grieving youth can be hosted virtually or in-person and tailored to meet the needs of your team.

- Sessions can range from 1.5 to 6 hours.

Continuing Education

OhioHealth Loss and Healing Services is approved through the Ohio Counselor, Social Worker, and Marriage and Family Therapist (CSWMFT) Board to provide continuing education.

Please reach out to us to learn more about fees related to professional development trainings for your team!
